

FLAX

WATERFREE URINAL
VITREOUS CHINA

Used in conjunction with our High Performance Key-Valve (HPKV), the most robust, high performance dry valve in the market. Through our patent-pending Bell Valve our HPKV technology provides safe, long lasting, low odor performance.

Falcon Waterfree urinals reduce water and sewer costs, maintenance and repair bills, and create more hygienic, odour-free restrooms. A patented, sealed cartridge eliminates the need for water, conserving an average of 150.000 Liters per urinal each year.

With waterfree urinals, water does not have to be pumped to or from the urinal. This saves energy, which in turn reduces carbon dioxide emissions associated with energy production - emissions that would otherwise contribute to global warming.

Purchasing and installing Falcon Waterfree urinals is less expensive than manual and automatic flush units because flush valves and associated piping are not required. Maintenance costs and vandalism problems associated with flush valves are also eliminated.

FEATURES

- Touch-free operation
- Uses no water
- Mechanical-free design
- Patented, sealed locking cartridge
- Maintenance-free cartridge
- Smooth, non-porous surfaces
- Vitreous china bowl

BENEFITS

- Improved hygiene and safety
- Reduced water and sewer costs
- No costly flush valve or sensor repairs
- Odour-free and vandal proof
- No need to replenish sealant between changes
- Minimal care and easy cleaning
- Unsurpassed durability

Installation Details

Please use 50mm PVC drain pipe

A 50mm Kee Seal and Screwed Elbow is provided to link the urinal to the drain pipe.

Urinal mounting height is approx 600mm from the floor to the front lip of the urinal.

The 50mm drain pipe should be installed 430mm from the floor to the centre of the pipe.
